www.danbaghilovici.dev

Experienced software developer with a specialized emphasis on **web and mobile development**, adeptly using **Angular and Java** technologies to architect exceptional solutions. With strong problem-solving skills and proactive approach I integrate frontend and backend components to create seamless user experiences. This combined with effective communication and collaboration abilities, positions me as a versatile developer who thrives in team-oriented environments.

Work Experience

Software Developer at **Berg Software**

Berg Software operates as a distinguished outsourcing establishment, offering specialized development teams and comprehensive team extension solutions to prominent software enterprises. Within this framework, my principal duties encompass:

- Develop, maintain, test and improve existing Java / Spring REST API services by reducing dependencies, refactoring with the usage of TDD making the application more robust and reliable.
- Develop and maintain efficient APIs that are reliable, easy to maintain and catering to all internal and external client needs using the Neonbee framework.

Software Developer at **Vlinde Transylvania**

Rooted in Germany, Vlinde operates as a prominent web design agency that prioritizes elevating the customer experience within its service offerings. Highlighted below are several pivotal responsibilities in which I actively engaged:

- Engage in the development, maintenance, and enhancement of current PHP / Laravel applications and services resulting in the creation of applications that are not only lighter, but also fortified in security and optimized for increased speed.
- Architect and engineer scalable mobile applications utilizing Angular, the Ionic framework, and Firebase Services. This concerted effort yields a swift MVP meticulously aligned with customer requisites and poised for market deployment.
- Build microservices and automation tools using Python and Docker.

Technical Skills

Java

Spring, Vert.x,

Javascript

Angular, Ionic, NodeJS,

DBMS

MongoDB, MySQL,

Education

Degree in Computational Mathematics

Universidad JAUME I
2013

Bachelor of Science

IES Joan Coromines
2011 - 2013

Education

- English
- Romanian
- Spanish
